Early Risk Alert AI™

AI-Powered Predictive Health Monitoring Platform
Predicting Patient Deterioration Before Emergencies Happen

Milton Munroe
Founder & AI Systems Engineer

📞 732-724-7267

Healthcare is Reactive Instead of Predictive

- Hospitals detect deterioration too late
- Clinicians cannot monitor all patients continuously
- Subtle warning signs go unnoticed
- Late intervention leads to:

Cardiac events
ICU admissions
Preventable deaths
Higher hospital costs
80% of critical events show warning signs hours before crisis

Early Risk Alert AI™

A real-time predictive intelligence platform that:

✔ Continuously monitors patient vital signs
✔ Uses AI to detect early deterioration patterns
✔ Sends instant alerts to care teams
✔ Enables intervention BEFORE emergencies happen

From Reactive Care → To Predictive Prevention

AI-Powered Clinical Intelligence Engine

1. Patient vitals stream into system
2. AI models analyze risk patterns in real time
3. Risk score updates continuously
4. Alerts trigger when danger thresholds detected
5. Clinicians intervene earlier

⚡ Processes thousands of patients simultaneously
⚡ Works with hospital systems & remote monitoring devices

Live Clinical Command Center

AI-powered real-time monitoring for hospitals and health systems

Who We Serve

🏥 Hospitals & Health Systems
🩺 Remote Patient Monitoring Providers
🏠 Telehealth & Virtual Care Platforms
🧓 Chronic Disease Management Programs
🧠 Cardiology & ICU Departments

Initial Focus: U.S. hospital systems & remote care providers

Massive & Growing Market

- Global Remote Patient Monitoring Market

→ $30B+ by 2030

- U.S. Hospitals spend billions annually on preventable complications
- Shift toward value-based care demands predictive tools

Hospitals need earlier detection

Why Early Risk Alert AI Wins

✔ Real-time predictive modeling
✔ AI-driven early risk scoring
✔ Multi-patient command center
✔ Designed for clinical workflow
✔ Scalable across entire hospital systems

Not just monitoring — PREDICTING

Scalable Saas Healthcare Platform

💼 Hospital Licensing
• Annual enterprise contracts
• Per-bed pricing model

☁️ Platform Subscriptions
• Remote monitoring providers
• Telehealth platforms

🔗 API Integrations
• Device manufacturers
• Health systems

Recurring Revenue Model

Development Progress

- ✔ AI prediction models developed
- ✔ Live monitoring dashboard built
- ✔ Cloud infrastructure deployed
- ✔ Healthcare data simulation tested
- ✔ Business entity formed
- ✔ Professional website & brand launched

Transforming Global Healthcare

Our Mission:
To become the AI-powered backbone of real-time patient monitoring worldwide.

We envision a future where:
✔ Medical emergencies are predicted early
✔ Hospitals prevent deterioration instead of reacting
✔ AI supports every critical care decision

Saving lives through predictive intelligence

Milton Munroe

Founder & AI Systems Engineer

- AI systems developer
- Healthcare technology innovator
- Builder of predictive risk platforms
- Focused on preventive care innovation

Mission-driven to modernize patient monitoring

Seeking Seed Investment

Capital will be used to:

- Expand AI engineering team
- Secure hospital pilot programs
- Obtain healthcare certifications
- Enhance real-time data infrastructure
- Scale cloud deployment nationally

Investment accelerates market entry & partnerships
